**SPACE TYPES & REQUIREMENTS**

**Multipurpose Space (Dining/Assembly/Performance)**

**School Type:**

**Functional Area Descriptions**

The purpose of the Multipurpose Space for elementary students is to provide a location for student dining, assemblies and performances. This space should be designed and located to facilitate after-hours use by the community. Entry to this space shall be from the Commons. The Commons in an elementary school will act as a lobby space. The Multipurpose Room is encouraged to be configured to open to the Commons allowing for additional seating capacity and flexibility in the use of the space. If this option is selected, a movable wall/partition shall provide the capability for the dining area to be closed off in order to limit intrusion of noise and smells into the school during dining periods.

**1 Dining/Assembly Area**

This space should be designed to seat at least one third of the student population for lunches. This space should provide logical circulation and queuing with direct access to the kitchen serving line.

一般来说，学校将使用折叠桌带集成的座位来用于餐饮。对于集会和表演功能，座位可以是可转换的桌子或独立移动的椅子。如果计划使用独立移动的椅子，应考虑存储空间。这些椅子的存储空间将提供给学校或建筑物内的其他用户。
should be provided within the Multipurpose Space or in another conveniently located area. The size of the storage should be based on the anticipated space needed to provide flexible configuration of the Multipurpose Space. The storage area should be just large enough for storage of items specifically used in the Multipurpose Space. The recommended size for this area is between 200-600 SF and the area will be deducted from the overall area of the Multipurpose Space to encourage efficient design of this space.

2 Raised Platform
The Raised Platform area should be elevated but be fully accessible from the public area at a minimum. A ramp is the preferred means of access. Adjacency to the Music Room is desired to provide a “green room” for performances.

3 Performance Storage
Performance Storage should be located at the same elevation as the Raised Platform to facilitate movement of props and equipment. Where possible, provide double doors for access.

Specialized Features
The technology for this space should be seamless and include at least the following provisions:
- Audio and voice enhancement capabilities that can be deployed easily.
- Multiple display platforms such as large electrically operated drop-down screens, portable display furniture, interactive whiteboard access (movable) and large flat screen televisions or monitors.
- Easily adjustable lighting suitable for sufficient, overall general lighting as well as special centralized lighting circumstances.
- Acoustical equipment that can be easily adjusted.
- A minimum of two (2) microphone ports on the Raised Platform and two (2) on the face of the Raised Platform.
- A minimum of two (2) data ports on the Raised Platform and two (2) on the face of the Raised Platform.
- A minimum of two (2) microphone ports and two (2) data ports on other walls within the Multipurpose Space.
- Simple stage rigging.
- Stage curtains including cyclorama curtains.
