

Build a Bird STEM Challenge

Dear Elliott Families,

We have a new exciting family STEM Challenge for you! As the birds continue to return to the Low Country, we have seen some interesting colors, shapes and sizes. Even Elliott's mascot, the Egret, is a Low Country bird we see in our community. Our next challenge is to invent a new kind of bird to fly on the walls of our school. Perhaps the bird is Hat Hatch, who has a body and head made of fancy hats, Maybe it's a Gamer Grouse, where drawings of cords and a game control can be used for feathers and the body. Use your imagination and put your creativity to flight! Check out [The Ice Cream Cone Coot, and other Rare Birds](#) by Arnold Lobel for more ideas. [Click here to watch!](#)

Please glue your imaginary bird to colored paper and add a habitat for it. Name the bird and write a short description of it's skill. Return it to school by February 4, 2022. The completed birds and their stories will decorate the cafeteria and the library so the students can enjoy them while they eat. They will be on display for the remainder of February and all of March. We look forward to the creative ways our families will soar with the Build a Bird Challenge!

Sincerely,

Ann Davis, STEM Coordinator, Elliott Elementary School
