OUTCOME

• Build awareness, understanding and support for GradeSpeed among DoDEA’s internal audiences (students, parents, teachers, counselors, administrators).

• Explain the implementation of GradeSpeed.

PRIMARY AUDIENCES/MESSAGES

Overall

• When parents and teachers communicate, everyone benefits and children have a much better chance to be successful.

• Frequent communication between teachers and parents enhances understanding of how educational needs can best be supported at school and home.

• GradeSpeed won’t replace face-to-face communication between parents and teachers.

Parents

• GradeSpeed is a powerful tool to help parents stay connected to their children’s educational progress.

• A teacher’s primary job is to teach and while communication with parents enhances the educational experience, parents have to be reasonable about expectations on responsiveness.

• This system and others like it have worked well for many public school systems.

Commanders

• Education and care of military families is critical to operational readiness.

• Helping military families stay connected during deployments benefits all members of the family. GradeSpeed is a great tool to enable communication on educational aspects of a child’s life.

DoDEA Employees

• Communication between teachers, students and parents is critical to student success. DoDEA is continually looking for tools and processes to make communication easier, more effective, and timelier.

Students

• Students may have concerns about how much information parents will have, however, children with parents who are involved in their education have a much greater chance to be successful.

COMMUNICATION STRATEGIES

Multiple-pronged approach, with most data coming from the principal and school administrators directly to the parents. Supplemental articles and TV and radio ads will round out communication efforts.

COMMUNICATION VEHICLES

• News Release
• Stories for local newspapers/newsletters
• Letter from principal to parents
• “How To” Sheet for parents
• Chat Room session
• PowerPoint Slides for use at Information Nights hosted by principals
• Radio Public Service Announcements

EVALUATION

Three months after launch, review user statistics. Increase communication efforts (TV PSA, additional newspaper article, etc.) if usage numbers are lower than expected.
