

The Community Partnership Program (CPP) is designed to bridge the gap between industry and education. DoDEA's goal of establishing outreach excellence and their strategic initiative to establish partnerships for student success has been recognized by numerous organizations within the KMC.

It is the belief of our community partners that bringing subject matter expertise into the classroom to help strengthen academic curriculum through authentic, engaging, real world application is often necessary to improve student understanding of current workforce practices, technologies and protocols.

In an effort to maximize the community's full potential, a comprehensive portal has been created to help align community assets with DoDEA high school programs. The Community Partnership Program is the culmination of this effort and will serve to support the local school programs through community involvement.

School Benefit:

- Provide teachers with direct access to local subject matter expertise
- Provide teachers with the ability to filter volunteers based upon content and support requirement (in-class, virtual, remote, etc.)
- Identification of possible Career Practicum opportunities

Adopt-a-Pro Community Portal:

- Open to all community professionals willing to support high school programs
- Twenty-five classroom programs identified, plus seven extra-curricular activities
- Targeted competencies align with DoDEA competencies and teacher specific requirements
- Simple to use registration with targeted competency proficiency levels
- Registrant information viewable only to subject-specific educators

Partner Select

The following professionals listed below have volunteered to support your program. Please consider using the drop-down menus to filter your selection.

Filter Options

| | | |
|-----------------------|--------------------|--------------------------------|
| Teaching Experience ▾ | Windows Security ▾ | Penetration Testing ▾ |
| Role ▾ | Linux Security ▾ | Cybersecurity Certifications ▾ |
| Career Practicum ▾ | Network Security ▾ | |

| Name | Title | Organization | Email |
|-----------------------------|----------------------------|--------------|--------------------------------|
| 1. Ricardo Hernandez (TSgt) | Sr. Network Field Engineer | USAF | ricardo.hernandez.15@us.af.mil |
