9. Select the **Mass Edit Type** from the drop-down list of values.
- Find and Replace a line:** Performs a search on the values entered in the **Find** line and replaces the information with the criteria on the **Replace** line. Any replacement of Project and Task must include Hours Type. To maintain daily hours already entered on the timecard, leave the replacement row of daily hours blank. This will retain the hours previously entered.
  - Find and Add a new line:** This function performs a search on the values entered in the Find line. If a match is found, a new line will be added to the timecard with the values entered in the Add line (e.g. eight holiday hours applied to all selected).
  - Delete a line from timecard:** Deletes the lines from the timecard(s) when the line matches the criteria entered in the Delete line fields. Use the wildcard (%) or exact values for pattern matching when using this Mass Edit type.
  - Add a new line to a timecard:** Allows the user to add values to the selected timecard(s). Wildcards are not appropriate for this Mass Edit Type. Use actual values to add a line.

**Note:** The wildcard or % sign preserves the previously entered value and includes it in the newly added line. If there is not a value in the field (e.g. the **Find** row contains a wildcard (%) and the corresponding field is blank in the **Replace** row) then the original value for that line is retained).
